## Who has trouble swallowing the pill ?

If 'you are what you eat,' then which medication are you?  
Answer the questionnaire !

Since 'you are what you eat,' which color medication would you prefer?

- Emerald green
- Ruby Red
- Sapphire Blue
- Diamond White
- Yellow Gold

By the way, since we're talking about it: Did you know that the most beautiful medication in the world is manufactured in front of the Taj Mahal in India ?

Yes / No

Medication is galenic in shape because it's also intended to be set on a pendant

True / False

Some diamonds heal and some medications serve as adornment

True / False

Up next: if you were medication, which shape would you swallow ?

(Please rank these in order of preference, assigning them a number from 1 to 11)

- diamond
- star
- circle
- pebble
- square
- cloud
- rainbow
- triangle
- shell
- crescent moon
- dolphin

If you were medication, would you rather be Anticancer, a Vitamin, a Painkiller, Triple combination therapy, a Contraceptive pill, a Sleeping pill, an Antidepressant, an Antirheumatic, an Anticoagulant, or Other (please specify)

As a medication, in day-to-day life, you would be

- an "active ingredient," which is to say at the heart of things
- or rather a "thin film," that is to say on the periphery, but ultra visible ?

If you were a safety precaution, you would be:

- Invisible
- Rectal
- All smiles

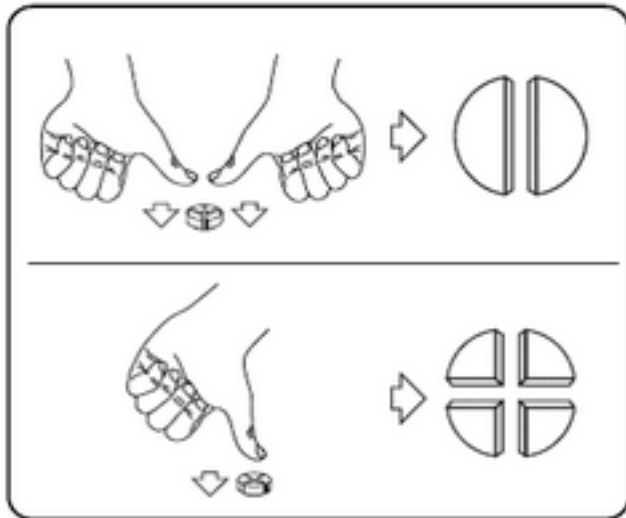

In general, are you afraid that someone will make you swallow the pill ?

Yes / No

In day-to-day life, do you crush your pills the same way people crush you ?

Yes / No

In general, do the pills stick in your throat like bad news?  
Always / In fact, I'm lucky

Are you able to compartmentalize your life as well as you can split a tablet?  
Yes / No

For you, this line on the tablet corresponds more to:  
the "minus" sign  
a slash sign  
a hyphen  
a division line  
the arrangement of rooms in your new apartment

Is it a coincidence that a medical drug looks like a circular diagram ?  
You're a conspiracy theorist / The signs are there

Have you ever noticed that Pac-Man's game design resembles Ecstasy pills? (circle your choice)

- Actually, Ecstasy takes the form of Pac-Man
- It's what Pac-Man eats (Pac-gum) that looks like Ecstasy

Do you think that Pac-Man is a metatheatrical version of our relationship to the pharmaceutical industry?

- That's going too far
- That's a bit basic, but you could say that
- Above all, it's a metatheatrical version of capitalism

In your opinion, was Tetris a game created by the pharmaceutical industry ?  
Stop / Enough

While we're talking blocks, did you know that:

The Blockbuster Comirnaty®, used in the prevention of COVID-19, brought in more than the Blockbuster Titanic, which brought in more than the Blockbuster Eliquis®, an anticoagulant, which brought in more than the Blockbuster Frozen ?

Interesting / Super interesting

If you were an adverse reaction, you would be:

- the protection of health data that jumps like a flea
- encryption with too-weak links
- the drawing of your profile, which appears increasingly clear
- a magnifying glass effect on your imperfections
- a backwards pore-refining strip

If you were a side effect to an adverse reaction (from the previous question), you would be:

- glycemia that caramelizes a bank loan
- platelets that turn red
- cholesterol that obstructs access to property

- an ulcerated passport
- a pointed-at paronychia

If you were an emergency number, you would be

- The turnover of Viagra
- The Johnson & Johnson CEO's phone PIN
- China's International Bank Account Number

If you were an overdose, you would be

- a profit in the form of a goiter
- a Rowenta on health data
- a cold sweat of 1000 mg

To wrap up, if you were the duration of a treatment, you would be:

- in case of pain, appreciating Taylorism for 3 days
- in case of fever, feeling like Pac-Man for 5 days
- if symptoms persist, calling Viagra's turnover figures

Lastly, making your own medical drugs would look like:

- "Houston, we have a problem," per astronaut Jack Swigert during the Apollo 13 space mission in 1970
- "Viva Las Vegas" by Elvis Presley
- "Just a Little Taste" by Rowan Martin
- Operation - Be the doctor in this classic game!
- "Baby I'm a Boss" by Wave Wave & FlexB

Test result

If most of your answers are conspiratorial, you tend to overprotect your personal data. Our advice: Trust them, support them while they expand and until they fly!

If most of your answers are tied to a vacuum cleaner, it's likely you've just moved into a new apartment. Our decorating tip: Install tinted and encrypted windows!

Finally, if most of your answers were taken orally, you're more the type of drug shaped like a cloud, the kind with a vague prescription left to melt under the tongue. Our advice: Come back to Earth and invest because your data is the bomb, baby, and it's even better than cryptocurrency!
